### Product Information

---

Growth differentiation factor -8 (GDF-8) also known as myostatin is a member of the [transforming growth factor-beta \(TGF-β\) superfamily](#), a group of proteins that play key roles in regulating cell growth, survival and differentiation. GDF-8 negatively regulates skeletal muscle cell proliferation and differentiation.

**Qkine animal origin-free recombinant GDF-8 (myostatin) protein will be available soon - email [ryan.weber@matriq.com](mailto:ryan.weber@matriq.com) for updates.**

### Alternative protein names

Growth Differentiation Factor 8, GDF8, myostatin, MSTN, Myostatin-B, MSLHP

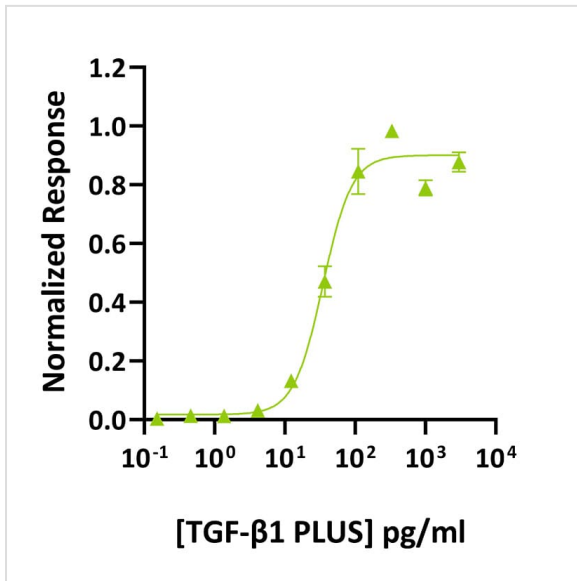

### Species reactivity

- human

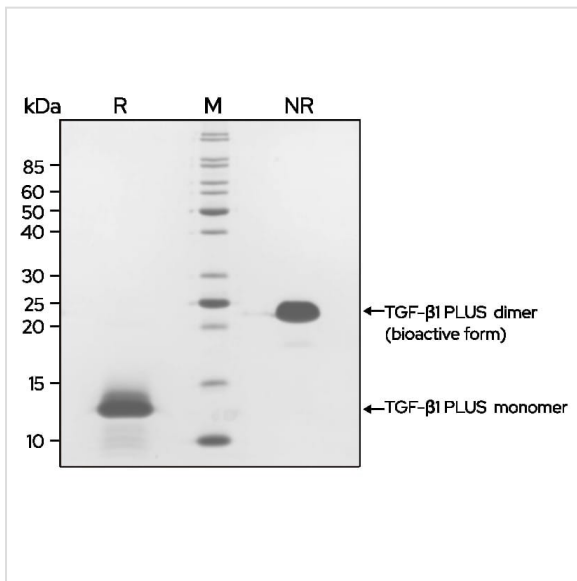

## Scientific Information
